

LCD Projector – Attending Site

To display the video conference image through an LCD projector:

1. Plug in and turn on your LCD projector.
2. Connect the LCD projector to the video conference equipment (see image below).
3. Change the input on the LCD projector to S-Video

Note: With this set up, the image from the video conference system will display through the LCD projector at all times. See the equipment user guide for alternative set up options.
