

Reminder to all referring providers using eConsult

- ✓ After submitting an eConsult to a specialist, they may request that you order additional diagnostic tests and will enter the information into the **Closeout Info** tab when closing the eConsult.
- ✓ As the primary care provider, you will receive a notification that the specialist has reviewed and closed the referral.
- ✓ Follow your normal process to order these tests, but please **do not cc the specialist on the requisition.**
- ✓ If the specialist has requested test results, fax them along with a cover letter which includes the following information:
 - referring provider's name
 - date of original eConsult request
 - your site name and site fax number

 Patient care remains with the primary care provider when you submit a referral to a specialist using eConsult.
