

#### Share content on a Mac

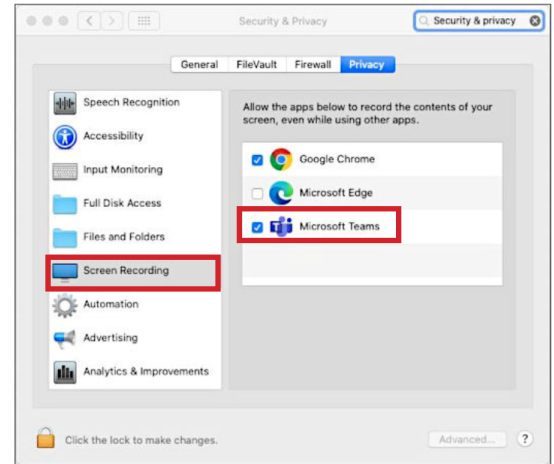

If you're using a Mac, you'll need to grant permission to Teams to record your computer's screen before you can share.

1 You'll be prompted to grant permission the first time you try to share your screen. Select **Open System Preferences** from the prompt.

2 Click **Screen Recording** and select **Microsoft Teams**.

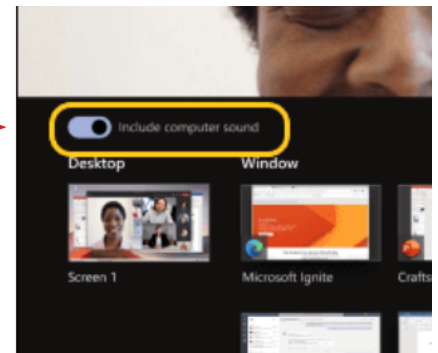

! If you miss the prompt, you can do this anytime by going to **Apple Menu > System Preferences > Security & Privacy**.

3 Go back to your meeting and try sharing your screen again by clicking Share content .

#### Key sharing content features

**Include computer sound:** when sharing content, you can select **include computer sound**, if required. All sound from your computer, including notifications, will be audible in the meeting.

**Give/Take back control:** you can give control to another meeting participant by selecting **Give control** on the sharing toolbar and selecting their name. To take control back, select **Take back control**.

**Request/release control:** you can also **Request control** from the presenter; the person sharing can approve or deny your request. When you're done, select **Release control**.

**Zoom in/out:** you can zoom in/out to shared content as well as clicking and dragging to see different areas. Use the keyboard shortcuts **Control + Plus sign** and **Control - Minus sign**; or hold the Control key and scroll with your mouse
